DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Neubauer et al., US Patent Number 5,953,673 (hereinafter Neubauer).

Regarding claim 6, Neubauer discloses a method for reaching subscribers in a cellular mobile radio communications system, comprising: temporarily assigning object identifications to subscribers, said temporary object identifications being formed by subscriber data sets that respectively define an entire subscriber environment of a virtual communication network within the cellular mobile radio communication system, wherein the cellular mobile radio communications system is configured for at least voice communication, wherein one or more subscriber data sets are assignable to subscribers of the cellular mobile radio communication system, and wherein the subscriber data sets are selected from a pool of predetermined subscriber data sets; and selectively allocating predetermined subscriber environments to respective authorized subscribers, the predetermined subscriber environments being defined by the subscriber data sets [col. 4: lines 60-64; col. 5: line 39 – col. 6: line 23].

Art Unit: 2681

Regarding claim 7, Neubauer discloses administering calls regarding subscriber data sets of the virtual communication network through an intelligent network [col. 5: lines 46-48].

Regarding claim 8, Neubauer discloses carrying out an authorization check of the subscribers, and allocating the subscriber data sets after a positive result of the authorization check is obtained [col. 4: lines 37-40].

Regarding claim 9, Neubauer discloses assigning a temporary, object-related and a permanent, individual subscriber environment to a subscriber, to whom an object identification has been assigned [col. 6: lines 3-23].

Regarding claim 10, Neubauer discloses reaching the subscriber always under the call numbers which correspond to the individual and the temporary subscriber environments currently assigned to the subscriber [col. 4: lines 19-22, 37-40].

Regarding claim 11, it is inherent that cellular radio communication systems can be configured for data communication, as it is known to send text messages wirelessly for example.

3. Claims 6, 8, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Pfundstein, US Patent Number 6,029,067 (hereinafter Pfundstein).

Regarding claim 6, Pfundstein discloses a method for reaching subscribers in a cellular mobile radio communications system, comprising: temporarily assigning object identifications to subscribers, said temporary object identifications being formed by subscriber data sets that respectively define an entire subscriber environment of a

Art Unit: 2681

virtual communication network within the cellular mobile radio communication system, wherein the cellular mobile radio communications system is configured for at least voice communication, wherein one or more subscriber data sets are assignable to subscribers of the cellular mobile radio communication system, and wherein the subscriber data sets are selected from a pool of predetermined subscriber data sets; and selectively allocating predetermined subscriber environments to respective authorized subscribers, the predetermined subscriber environments being defined by the subscriber data sets [col. 1: line 49 – col. 2: line 6; col. 2: lines 51-54].

Regarding claim 8, Pfundstein discloses carrying out an authorization check of the subscribers, and allocating the subscriber data sets after a positive result of the authorization check is obtained [col. 4: lines 62-65].

Regarding claim 11, Pfundstein discloses the cellular radio communication system is further configured for data communication [col. 3: lines 34-35].

Response to Arguments

4. Applicant's arguments with respect to claim 6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2681

Hentila et al., US Patent Number 6,044,259 disclose a system for subscriber administration in a telecommunication network.
